Print length : 461 pages

## Comprehensive Coverage

The Atlas is divided into three main sections: an introduction, a species accounts section, and a reference section. The introduction provides a general overview of the history of mammal recording in Great Britain and Northern Ireland, as well as an account of the methods used to compile the Atlas. The species accounts

section contains detailed information on each of the 54 mammal species, including their distribution, abundance, habitat preferences, diet, reproduction, and conservation status. The reference section includes a glossary of terms, a bibliography of sources, and a list of contributors.

### **Invaluable Resource for Scientists and Conservationists**

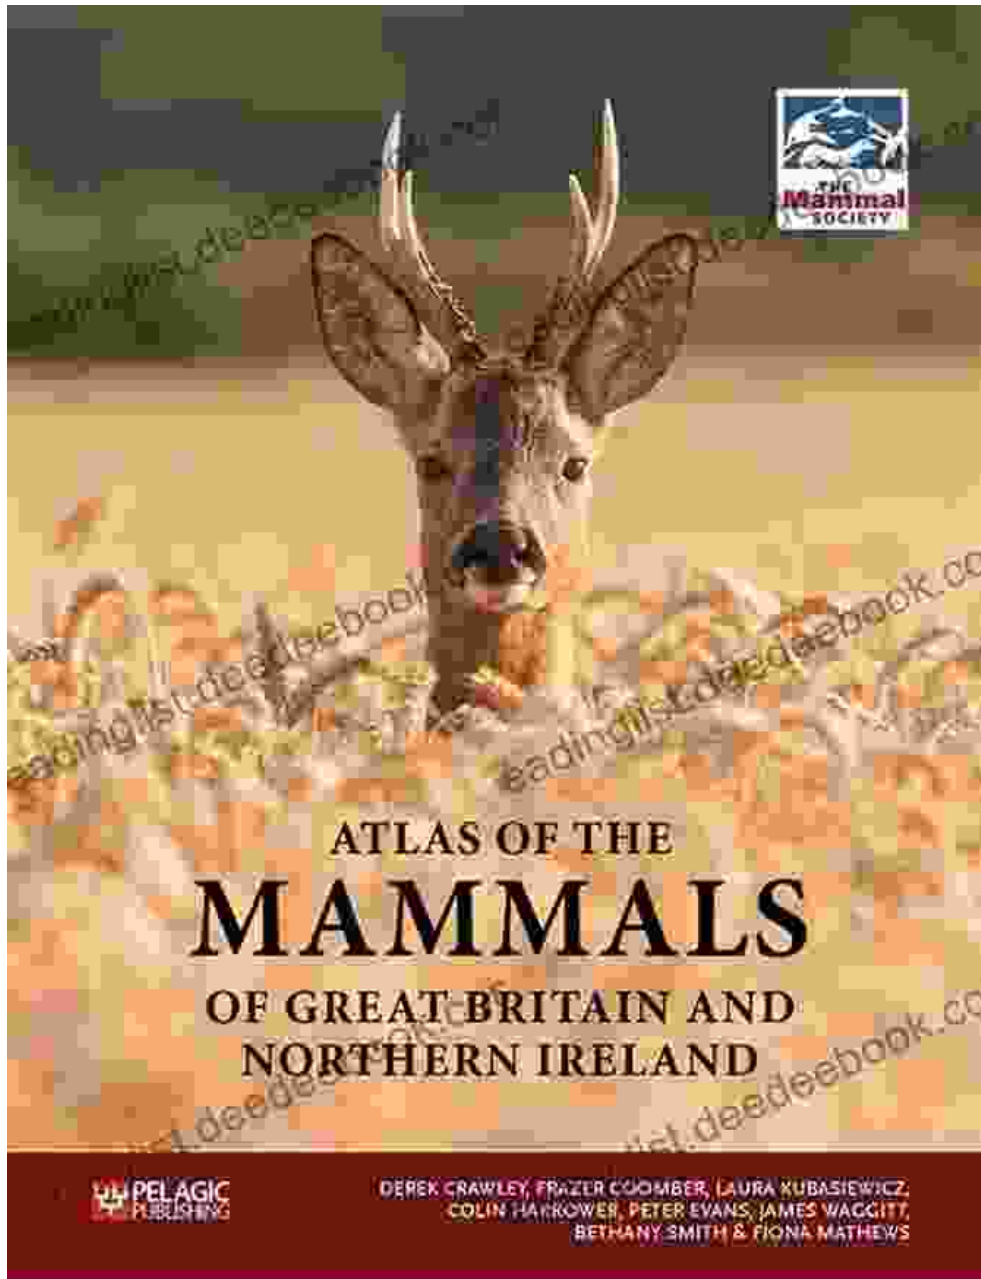

The Atlas is an invaluable resource for scientists, conservationists, and anyone interested in the mammals of Great Britain and Northern Ireland. It provides up-to-date information on the distribution and abundance of mammals, as well as their conservation status. This information can be used to inform land-use planning, conservation policy, and research.

### **Engaging and Accessible**

The Atlas is not only a valuable scientific resource, but it is also an engaging and accessible read for anyone interested in mammals. The text is clear and concise, and the book is beautifully illustrated with color photographs and maps. The Atlas is a must-have for anyone interested in the natural history of Great Britain and Northern Ireland.

### **Key Features**

- Comprehensive coverage of all 54 mammal species of Great Britain and Northern Ireland
- Detailed information on distribution, abundance, habitat preferences, diet, reproduction, and conservation status
- Clear and concise text, with beautiful color photographs and maps
- Invaluable resource for scientists, conservationists, and anyone interested in mammals

## Table of Contents

The Atlas of the Mammals of Great Britain and Northern Ireland is divided into the following sections:

- 1.
2. Species Accounts
3. Reference Section

The Species Accounts section is further divided into the following chapters:

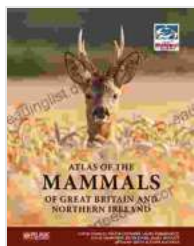

1. Insectivores
2. Bats
3. Carnivores
4. Pinnipeds
5. Cetaceans
6. Artiodactyls
7. Lagomorphs
8. Rodents

### **How to Use the Atlas**

The Atlas of the Mammals of Great Britain and Northern Ireland is designed to be used as a reference guide. The species accounts can be used to identify mammals, learn about their distribution and abundance, and understand their conservation status. The reference section can be used to find additional information on mammals, such as a glossary of terms, a bibliography of sources, and a list of contributors.

The Atlas of the Mammals of Great Britain and Northern Ireland is an essential resource for anyone interested in the mammals of these regions.

It provides comprehensive and up-to-date information on the distribution, abundance, and conservation status of all 54 species of mammals that occur in Great Britain and Northern Ireland. The Atlas is a valuable resource for scientists, conservationists, and anyone interested in the natural history of Great Britain and Northern Ireland.
