Content

The Teaching Atlas of Interventional Radiology is divided into two volumes:

- **Volume 1: Vascular Interventions** covers a wide range of vascular procedures, including angioplasty, stenting, and embolization. It also discusses the management of vascular malformations and the use of interventional techniques in the treatment of trauma and hemorrhage.

- **Volume 2: Non-Vascular Interventions** covers a variety of non-vascular procedures, including biopsies, abscess drainage, and tumor ablation. It also discusses the use of interventional techniques in the management of pain and the treatment of musculoskeletal disorders.

Each chapter in the Teaching Atlas of Interventional Radiology is written by a leading expert in the field and provides a detailed overview of the relevant procedures. The chapters are well-organized and easy to follow, with clear explanations and numerous illustrative images.

Features

The Teaching Atlas of Interventional Radiology is packed with features that make it an essential resource for both novice and experienced interventional radiologists.

- **Comprehensive Coverage:** The atlas covers the full spectrum of interventional radiology procedures, from basic to advanced.
- **High-Quality Images:** The atlas is richly illustrated with high-quality images that demonstrate the techniques and procedures described in the text.
